

GRATO SMART AIR PURIFIER 7 STAGE AIR PURIFICATION SYSTEM

Removes PM2.5

Multiple filtering

Releases Anions

Child lock

UV Sterilization

Intelligent Sensor

Touch control

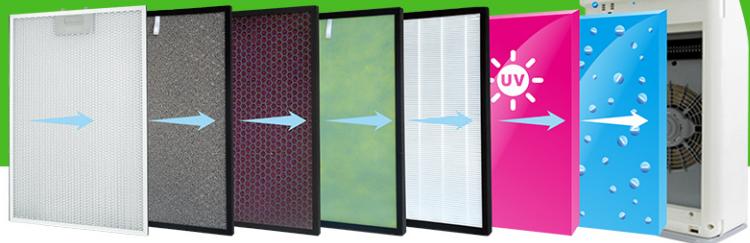

Remote Control

Silent Mode

Touch Screen

AIR QUALITY SENSOR SYSTEM

Excellent

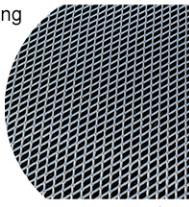

Moderately Polluted

Heavily Polluted

FEATURES :

- **Aluminum Pre-filter** -removes large dust, dander, pollen, floating compound and other pollutants. This filter is washable and reusable.

Aluminum Pre-filter

- **Cold Catalyst Filter** - will cause a catalyst effect in the environment without any external assistance like UV light, sunlight, high temperature or pressure. This filter is used to lessen formaldehyde, ammonia, benzene, TVOC, Hydrogen sulfide and other harmful gases released by plywood, furniture, wallpapers,carpets, curtains and bedspreads.

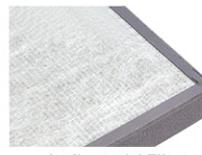

Cold Catalyst Filter

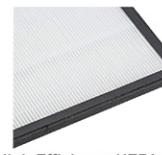

Formaldehyde Removal Filter

- **Formaldehyde Removal Filter** -this is the removal filter, designed to quickly absorb and decompose formaldehyde. It is made of top-quality material for enhanced durability. This removal filter is an ideal choice for household and office use. The honeycomb design with unique formaldehyde removal catalyst materials has been tested by the Shanghai Academy of Public Measurement.

Antibacterial Filter

High Efficiency HEPA Filter

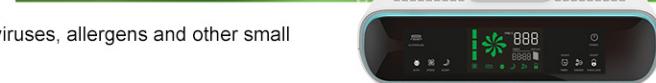

UV Sterilize Light

- **Antibacterial Filter** -the 5-micron sized filter with antimicrobial agents can efficiently kill bacteria in the air.

Anion Release

- **High Efficiency HEPA Filter** - the size of the HEPA filter is 0.01 micron, and it is able to eliminate particles which are larger than 0.01 micron with the filtration rate of 99% Dust, bacteria, fungi, viruses, allergens and other small and tiny particles are not able to get through the HEPA filter.

- **UV Sterilize Light** -using the UV Germicidal Lamp that produces a 365nm UV light, a variety of bacteria can be killed, purifying the air and eliminating odor caused by smoke and mold.

- **Anion Release** -the Ionizer releases a large amount of anions, making the oxygen negatively-charged, thus gathering the positively-charge particles like floating dust, bacteria, viruses and smoke.

SPECIFICATIONS

Name:	Smart Air Purifier	Voltage:	220v / 60Hz
Model:	AC-06	Noise (Low):	29.4dB
CADR:	320 m³/h	Housing:	ABS
Anion:	50 Millions pcs/cm	N.W:	8.0KG
PM2.5:	99.9%	Protections:	Children Lock, Panel Switch
UV Lamp:	365nm	App. Area:	up to 38m²
Rated Power:	88W	Size:	370*195*650mm
